

TRIM™ OM 210

High-performance, Cutting and Grinding Oil

TRIM OM 210 is a low-odor, light-colored oil designed for operations where low viscosity and high lubricity are required. In addition to general machining, OM 210 is particularly effective in deep-hole drilling and creepfeed grinding where its ability to flow into the cutting zone and "wet" the surfaces increases tool life and reduces heat.

High-Precision Parts Manufacturer Improves Tool Life and Eliminates Coolant Mist with TRIM® OM 210

The customer is a globally recognized precision parts manufacturer in Tamil Nadu, India. They specialize in creating parts for the automotive industry, with an emerging focus on farm equipment, pharmaceutical components, packaging, and electronics. The company has been in high demand since its establishment in 2003, undergoing almost half a dozen high-growth phases to continue supplying its ever-expanding clientele.

Choose OM 210:

- Light color and low odor
- High flash point
- Minimal carry over loss
- Excellent chips flushing and low foam
- Oxidation inhibited for longer life
- Excellent tool life properties

OM 210 especially for:

Applications — camshaft grinding, crankshaft grinding, creep-feed grinding, deep hole drilling, drilling, gear grinding, gear hobbing, milling, reaming, tapping, thread forming, and turning

Metals — aluminum alloys, carbide, nonferrous metals, steels, and titanium

Industries — aerospace, automotive, general industry, and medical

OM 210 is free of — chlorine and heavy metals

Health and Safety

TRIM™ OM 210

High-performance, Cutting and Grinding Oil

Application Guidelines

- TRIM OM 210 is designed to be used straight.
- For additional product application information, including performance optimization, please contact your Master Fluid Solutions' Authorized Distributor at <https://www.masterfluids.com/ap/en-ap/distributors/index.php>, your District Sales Manager, or email us at info@masterfluids.com.

Physical Properties Typical Data

Color	Light Yellow to Amber
Odor	Mild
Form	Liquid
Flash Point	> 175°C
Viscosity	11.00 mm ² /s @40°C

Ordering Information

20-liter pail

204-liter drum

1000-liter tote
