

WEDOLiT® CN 8250-2

Minimum quantity lubricant

WEDOLiT CN 8250-2 is a volatilizing high-performance lubricant, designed for use in all types of low and minimum quantity lubrication systems for milling, sawing, thread cutting and cold forming applications of non-ferrous metals

Physical Properties Typical Data

Parameter	Typical results	Tested according to
Appearance:	Yellowish, clear	Visual
Density at 20°C:	0.80 g/cm ³	ASTM D 7042
Viscosity at 40°C:	2.0 mm ² /s	ASTM D 7042
Flash point:	> 75 °C	DIN EN ISO 2719
Copper corrosion:	1a	DIN 51759-1

Application Guidelines

The product must be stored frost-free between 5 - 40 ° C.

The minimum shelf life in the closed original container is 24 months.

Additional Information

The information herein is given in good faith and believed current as of the date of publication and should apply to the current formula version. Because conditions of use are beyond our control, no guarantee, representation or warranty expressed or implied is made. Consult Master Fluid Solutions for further information. Choose WEDOLiT CN 8250-2:

- High pressure absorption capacity as well as excellent wetting and lubricating effect
- No gumming and sticking
- Reduces build-up of material on steels with a low carbon content
- The excellent cooling and lubricating properties lead to a significant increase in service life of tools and to high dimensional accuracy of workpieces
- Ensures extremely economical use
- Can be easily and safely removed by spray, immersion and ultrasonic cleaning with neutral or alkaline industrial cleaners or with organic solvents

Health and Safety
