

# WEDOLiT™ FN 1872-50

## Reactive drawing oil

WEDOLiT FN 1872-50 is a water-insoluble, reactive drawing oil, based on special phosphoric acid esters, which creates an iron phosphate layer on iron and steel parts. The product is free of chlorine, sulphur or nitrites.

## Physical Properties Typical Data

Parameter	Typical results	Tested according to
Appearance:	Brown, liquid	Visual
Density at 20°C:	0.92 g/cm <sup>3</sup>	ASTM D 7042
Viscosity at 40°C:	50.0 mm <sup>2</sup> /s	ASTM D 7042
Flash point:	Not determined	DIN EN ISO 2719
Copper corrosion:	Not determined*	DIN 51759-1

\*Discolourations of non-ferrous metals should be examined in preliminary tests

## Application Guidelines

Storage must be frost-free between 5 - 40°C.

The minimum durability is 24 months in an original sealed package.

## Choose WEDOLiT FN 1872-50:

- The product is used in a heated bath with a temperature of  $T_{\text{Bath}} = 60^{\circ}\text{C} \pm 5^{\circ}\text{C}$
- After 10 - 15 min, a sufficient film should have been developed on the tube surface (residues of lime- or carbon deposits must be removed preliminary)
- It is important to keep the water content in the product at a value of 1 - 1.7%, to form uniform phosphate layers on the tube surface
- The product offers a short-term corrosion protection (max. a few days)
- The pipes can be cleaned after drawing with alkaline cleaners, solvents or bright annealing

## Health and Safety
