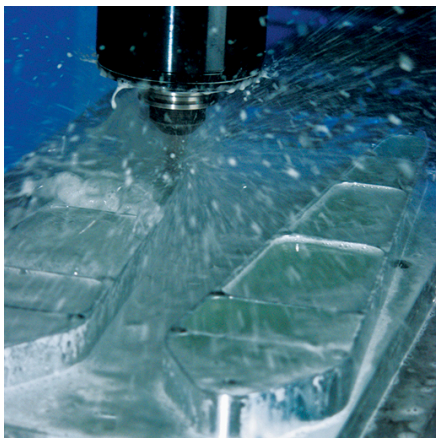
TRIM™ SC410

Chlorine-free Semisynthetic Coolant

TRIM SC410 is a chlorine-free, semisynthetic coolant using vegetable-derived and ester lubricants. It is very clean running in moderate-duty machining and grinding of both ferrous and nonferrous materials. In addition to its broad range of machining qualities, it has been specially optimized for machining "gray iron"castings and for surface and cylindrical grinding of ferrous materials.

Semisynthetics



Cutting edge solutions:

TRIM® semisynthetics offer the cooling and lubricity of a synthetic without the higher oil content of an emulsion. Designed to operate at higher SFPM, semisynthetics perform well on many operations including face milling, cut-off turning, grinding, tapping, and drilling — depending on the specific product.

Semisynthetics are compatible with aluminum alloys, alloy steels, tool steels, cast irons, copper alloys, as well as plastics and composites. With less carryoff, semisynthetics use less material — it all adds up to lower costs.

Choose SC410:

- Based on our exclusive ester lubricant technology, contains no mineral (petroleum) oil
- Low foaming in most operations
- Compatible with a very wide range of materials including ferrous, nonferrous, and nonmetallic material
- Will provide superior sump life and corrosion inhibition for long periods of time without adds
- Prevents chip "clinkering" and "hot" chip hoppers when machining cast iron
- Will keep the machine and work environment clean even when machining or grinding gray iron
- Contains no chlorine or sulfur-based additives
- Contains no nitrites, sulfonates, Alkylphenol Ethoxylates, or phenols and is not SARA 313 reportable
- Very low carryoff and long sump life, delivering low operating costs
- Hard water tolerant up to 30 grains

SC410 especially for:

Applications — cylindrical grinding, grinding, moderate-duty machining, and surface grinding

Metals — cast iron, ferrous metals, gray iron, and most nonferrous metals

Industries — automotive and compressor

SC410 is free of — alkylphenol ethoxylates, chlorine, nitrites, phenols, SARA 313 listed ingredients, sulfonates, and sulfur-based additives

Master Fluid SOLUTIONS™

TRIM™ SC410

Chlorine-free Semisynthetic Coolant

Application Guidelines

- The minimum recommended concentration is 5,0% on cast iron and 4,0% on steel.
- Running at or above 5,0% offers better corrosion inhibition, tool life, and sump life. However, the best concentration for your operation should be determined by on-site testing.
- Not recommended on magnesium or zirconium without special precautions.
- For additional product application information, including performance optimization, please contact your Master Fluid Solutions' Authorized Distributor at https://www.masterfluids.com/vnm/en-vnm/distributors/index.php, your District Sales Manager, or email us at vietnam-info@masterfluids.com.

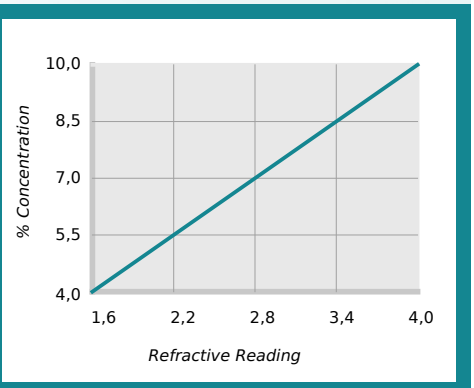
Physical Properties Typical Data

Color (Concentrate)	Yellow to orange
Color (Working Solution)	Light yellow
Odor (Concentrate)	Mild
Form (Concentrate)	Liquid
Flash Point (Concentrate) (ASTM D92-90)	> 100°C
pH (Concentrate as Range)	9,8 - 10,0
pH (Typical Operating as Range)	9,2 - 9,8
Coolant Refractometer Factor	2,5
Titration Factor (CGF-1 Titration Kit)	0,45
Digital Titration Factor	0,0150
V.O.C. Content (ASTM E1868-10)	169 g/l

Recommended Metalworking Concentrations

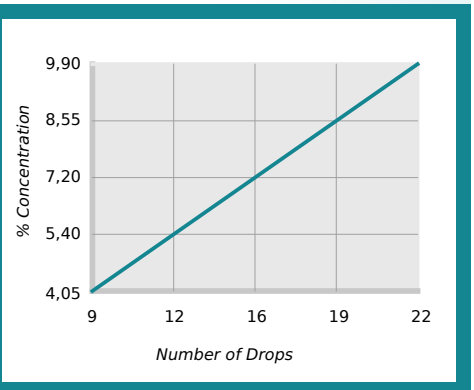
Light Duty	4,0% - 6,5%
Moderate Duty	6,5% - 8,5%
Heavy Duty	8,5% - 10,0%
Design Concentration Range	4,0% - 10,0%

Concentration by % Brix



% Concentration = Refractive Reading x Refractive Factor
Coolant Refractometer Factor % Brix = 2,5

Concentration by Titration



% Concentration = No. of Drops x Titration Factor
Titration Factor = 0,45

Health and Safety

TRIM™ SC410

Chlorine-free Semisynthetic Coolant

Mixing Instructions

- Recommended usage concentration in water: 4,0% - 10,0%.
- To help ensure the best possible working solution, add the required amount of concentrate to the required amount of water (never the reverse) and stir until uniformly mixed.
- Use premixed coolant as makeup to improve coolant performance and reduce coolant purchases. The makeup you select should balance the water evaporation rate with the coolant carryout rate. Use our Coolant Makeup Calculator to find the best ratio for your machine: apps.masterfluids.com/makeup/.
- Use mineral-free water to improve sump life and corrosion inhibition while reducing carryoff and concentrate usage.

Ordering Information

20-liter pail

204-liter drum

1000-liter tote

Additional Information

- Use Master STAGES™ Whamex XT™ for a quick and thorough precleaning of your machine tool and coolant system.
- Consult Master Fluid Solutions before using on any metals or applications not specifically recommended.
- This product should not be mixed with other metalworking fluids or metalworking fluid additives, except as recommended by Master Fluid Solutions, as this may reduce overall performance, result in adverse health effects, or damage the machine tool and parts. If contamination occurs, please contact Master Fluid Solutions for recommended action.
